Authorised to work in the EU:	No – will request permit assistance from company
Driving licence?	Yes
Special considerations	I have had an outstanding education in my university and Aquatic Sciences has been my first career choice due to the fact that I've always been connected to the sea and Portugal was an excellent potential of Aquaculture as well as other aquatic science fields for its coastal territory. Since I started my graduation, I've been looking for some internship programmes abroad because I understand that having work experience can lead to great success in my career and gives me the possibility to learn new education methods and innovative aspects of Aquaculture Research such as other aquatic domains.
